Declaration of Lars Severinsson  
Applicant: Haldex AB

- 5) I believe the original patent to be partly inoperative or invalid because the claims include unnecessary limitations, and patentee claimed less than patentee had the right to claim in the patent. One error in particular is that no independent claim is broadly directed to the novel concept relating to the wedge configuration of the disc brake system without also requiring a cover (2).
- 6) This defect arose through error without deceptive intent in that the true invention was disclosed in the application but was not sufficiently claimed in the patent.
- 7) A thorough review and study of the claim coverage of this patent revealed these errors and led to the filing of this reissue application.
- 8) Every error in the patent in the present reissue application, particularly those not covered by the prior declaration submitted in this application, arose without any deceptive intention on the part of the applicant.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
